OZONE DEPLETING SUBSTANCES AND OTHER HALOCARBONS REGULATION, M.R. 103/94

Application for Permit – Class 1 (CFC) Chillers

Manitoba

In Manitoba, owners/operators (persons who own or have care and control of the building, structure or part of a building or structure where the equipment is installed) are required to obtain a Class 1 (CFC) Chiller Permit for each CFC-based chiller. A chiller is defined as air-conditioning or refrigeration equipment that has a compressor, evaporator and secondary refrigerant. The permit will remain valid until the chiller undergoes a major overhaul and is concurrently converted to operate with an alternate refrigerant, decommissioned, replaced or by December 31, 2014. These requirements are in accordance with Section 15 of *Manitoba Ozone Depleting Substances and Other Halocarbons Regulation* 103/94. **NOTE**: A permit must be obtained for each Class 1 (CFC) Chiller for continued operation; service technicians may not service the equipment unless a valid permit is in place.

All applications for permits are to be submitted with the total payable to MOPIA (Manitoba Ozone Protection Industry Association). MOPIA is authorized to retain fees and issue permits as prescribed under Section 28 of Manitoba Regulation 103/94.

☐ **Class 1 (CFC) Chiller Permit $50.00** **Method of Payment:** ☐ **cheque** ☐ **money order**	**Make cheque or money order payable to MOPIA.** ***Do not send cash in the mail. Cash payments may be made in person at the Manitoba Ozone Protection Industry Association (MOPIA) office located at*** **1082 Main Street** **Winnipeg MB R2W 5J3**

A. GENERAL APPLICANT INFORMATION- PLEASE COMPLETE ALL INFORMATION REQUESTED IN SECTIONS A AND B.		
Organization	Fax	Business Phone
Contact/Designate Name and Title	Email	
Business Address		Postal Code
Mailing Address, if different from above		Postal Code

B. CLASS 1 (CFC) CHILLER INFORMATION		
Type of refrigerant being used	Building location of CFC-Chiller	
Equipment manufacturer	Equipment serial number	Equipment model number
Age of CFC-Chiller (years)	Charging capacity (tons)	
Total amount of refrigerant in use	Total amount of refrigerant in storage (# cylinders & amount/cylinder)	

A major overhaul means any procedure or repair that requires replacement or modification of an internal sealing device or the replacement or modification of any internal mechanical parts other than an oil heater or pump, a float assembly, and a vane assembly in a single-stage compressor; or any procedure or repair required to fix an evaporator or condenser heat exchanger tube failure.

Proposed date of major overhaul:

Plan is to ☐ convert to _____ or ☐ replace with _____ or ☐ decommission

I declare that the contents of this application are true and accurate and understand that providing false information may result in the refusal, cancellation or suspension of my permit.	*Owner/Operator or Delegate Signature:* *X* _____
